What this report lays out

- Source instrument: DN4
- Item count: 10 items
- Response format: Yes, No
- Respondent: Clinician

CLINICIAN REVIEW REQUIRED

This document demonstrates Lirena's report design using fictional data. It does not represent a scored DN4 result, cannot establish a diagnosis, and must not be placed in a clinical record.

DN4 is completed by a clinician and includes examination findings. A score does not diagnose a nerve lesion.

A report designed for clinical review

Synthetic DN4 example. The gauges and rows use this instrument's groups and range. They are not a client record.

REVIEW

DN4 is completed by Clinician. Response options: Yes, No. Reference period not sourced. The result is for clinician review.

CONTEXT

The total is the number of the ten items answered Yes (0-10). Items 8 to 10 record the examining clinician's findings. Lirena's implemented cutoff is 4.

BOUNDARY

DN4 is completed by a clinician and includes examination findings. A score does not diagnose a nerve lesion.

REPORT PRINCIPLE

Show the evidence, the version, and the boundary. Leave diagnosis and formulation with the clinician.

DN4 response pattern

Synthetic responses for DN4. The table uses this instrument's groups and range. It is not a client record and does not reproduce official item wording.

ITEM	GROUP	SYNTHETIC RESPONSE
1	Total	Yes
2	Total	No
3	Total	Yes
4	Total	No
5	Total	Yes
6	Total	No
7	Total	Yes
8	Total	No
9	Total	Yes
10	Total	No

Synthetic DN4 values only. Not a client record.

Source-led by design

Lirena separates published methodology, product implementation, and clinical approval. A citation does not by itself authorize administration or prove a software scoring rule.

INSTRUMENT

DN4 asks about symptoms and, in the full clinician version, signs associated with neuropathic pain. A screen is not a diagnosis of a nerve lesion and does not replace examination.

ADMINISTRATION

DN4 is completed by Clinician. Response options: Yes, No. Reference period not sourced. The result is for clinician review.

CLINICAL BOUNDARY

DN4 is completed by a clinician and includes examination findings. A score does not diagnose a nerve lesion.

METHODOLOGY

The total is the number of the ten items answered Yes (0-10). Items 8 to 10 record the examining clinician's findings. Lirena's implemented cutoff is 4.
