What this report lays out

- Source instrument: Peak Pruritus NRS
- Item count: 1 item
- Response format: 11 options
- Respondent: Patient

CLINICIAN REVIEW REQUIRED

This document demonstrates Lirena's report design using fictional data. It does not represent a scored Itch NRS result, cannot establish a diagnosis, and must not be placed in a clinical record.

The Peak Pruritus NRS is the client's own rating of worst itch, not a diagnosis.

A report designed for clinical review

Synthetic Peak Pruritus NRS example. The gauges and rows use this instrument's groups and range. They are not a client record.

REVIEW

Peak Pruritus NRS is completed by Patient. Response options: 0 - no itch, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 - worst itch imaginable. Reference period not sourced. The result is for clinician review.

CONTEXT

A single reported intensity rating for clinician review. The recorded value is the client's own rating and carries no severity band or diagnostic meaning. The implemented range is 0 to 10. Cutoff not implemented in Lirena.

BOUNDARY

The Peak Pruritus NRS is the client's own rating of worst itch, not a diagnosis.

REPORT PRINCIPLE

Show the evidence, the version, and the boundary. Leave diagnosis and formulation with the clinician.

Peak Pruritus NRS response pattern

Synthetic responses for Peak Pruritus NRS. The table uses this instrument's groups and range. It is not a client record and does not reproduce official item wording.

ITEM	GROUP	SYNTHETIC RESPONSE
1	Total	0 - no itch

Synthetic Peak Pruritus NRS values only. Not a client record.

Source-led by design

Lirena separates published methodology, product implementation, and clinical approval. A citation does not by itself authorize administration or prove a software scoring rule.

INSTRUMENT

The Peak Pruritus NRS asks for the itch at its worst moment during the previous 24 hours, from 0 (no itch) to 10 (worst itch imaginable). It is not a dermatology diagnosis, not a 5-D Itch scale, and not a laboratory algorithm.

ADMINISTRATION

Peak Pruritus NRS is completed by Patient. Response options: 0 - no itch, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 - worst itch imaginable. Reference period not sourced. The result is for clinician review.

CLINICAL BOUNDARY

The Peak Pruritus NRS is the client's own rating of worst itch, not a diagnosis.

METHODOLOGY

A single reported intensity rating for clinician review. The recorded value is the client's own rating and carries no severity band or diagnostic meaning. The implemented range is 0 to 10. Cutoff not implemented in Lirena.
