T-SCORE

23.3 / 60.1

DEMO SYNTHETIC

23.3/60.1

What this report lays out

- Source instrument: PROMIS Physical Function
- Item count: 8 items
- Response format: Varies by item
- Respondent: Patient

CLINICIAN REVIEW REQUIRED

This document demonstrates Lirena's report design using fictional data. It does not represent a scored PROMIS Physical Function result, cannot establish a diagnosis, and must not be placed in a clinical record.

The reported result is the published T-score. A low score is not a disability diagnosis.

A report designed for clinical review

Synthetic PROMIS Physical Function example. The gauges and rows use this instrument's groups and range. They are not a client record.

REVIEW

PROMIS Physical Function is completed by Patient. Response format varies by item. Reference period not sourced. The result is for clinician review.

CONTEXT

Lirena uses this rule. Score range: T-score 20.360.1 (Physical Function 8b); higher is better function. Severe (20.330.0), Moderate (30.140.0), Mild (40.144.9), Within normal limits (45.060.1). The reported result is the published T-score. A low score is not a disability diagnosis.

BOUNDARY

The reported result is the published T-score. A low score is not a disability diagnosis.

REPORT PRINCIPLE

Show the evidence, the version, and the boundary. Leave diagnosis and formulation with the clinician.

PROMIS Physical Function response pattern

Synthetic responses for PROMIS Physical Function. The table uses this instrument's groups and range. It is not a client record and does not reproduce official item wording.

ITEM	GROUP	SYNTHETIC RESPONSE
1	T-score	Synthetic response
2	T-score	Synthetic response
3	T-score	Synthetic response
4	T-score	Synthetic response
5	T-score	Synthetic response
6	T-score	Synthetic response
7	T-score	Synthetic response
8	T-score	Synthetic response

Synthetic PROMIS Physical Function values only. Not a client record.

Source-led by design

Lirena separates published methodology, product implementation, and clinical approval. A citation does not by itself authorize administration or prove a software scoring rule.

INSTRUMENT

PROMIS Physical Function sits in the pain-clinic catalogue as a function measure, not as a replacement for examination or performance testing. Short forms and CAT administrations are different products.

ADMINISTRATION

PROMIS Physical Function is completed by Patient. Response format varies by item. Reference period not sourced. The result is for clinician review.

CLINICAL BOUNDARY

The reported result is the published T-score. A low score is not a disability diagnosis.

METHODOLOGY

Lirena uses this rule. Score range: T-score 20.360.1 (Physical Function 8b); higher is better function. Severe (20.330.0), Moderate (30.140.0), Mild (40.144.9), Within normal limits (45.060.1). The reported result is the published T-score. A low score is not a disability diagnosis.
