What this report lays out

- Source instrument: SDQ, P4-17 parent
- Item count: 25 items
- Response format: Not True, Somewhat True, Certainly True
- Respondent: Parent / informant

CLINICIAN REVIEW REQUIRED

This document demonstrates Lirena's report design using fictional data. It does not represent a scored SDQ result, cannot establish a diagnosis, and must not be placed in a clinical record.

SDQ does not diagnose a mental health condition. It is a screen and monitoring aid for clinician review.

A report designed for clinical review

Synthetic SDQ, P4-17 parent example. The gauges and rows use this instrument's groups and range. They are not a client record.

REVIEW

A parent completes all 25 items. Not True, Somewhat True and Certainly True are the only answers. This form does not include the impact supplement. Partial answers are not scored.

CONTEXT

Lirena uses this rule. Score range: Total difficulties 0-40. Emotional problems, conduct problems, hyperactivity, peer problems and prosocial 0-10. Externalising and internalising 0-20.. Parent completed four-band cut-points from the 20 June 2016 scoring notes. Total: Close to average 0-13, Slightly raised 14-16, High 17-19, Very high 20-40. Prosocial bands run in the opposite direction. Externalising and internalising have no bands. This SDQ entry is the P4-17 parent form. All 25 answers are required. The impact supplement is not included. A score is not a diagnosis. Item groups: Emotional problems (membership on the scoring rule, 0 to 10); Conduct problems (membership on the scoring rule, 0 to 10); Hyperactivity (membership on the scoring rule, 0 to 10); Peer problems (membership on the scoring rule, 0 to 10); Prosocial (membership on the scoring rule, 0 to 10); Externalising (membership on the scoring rule, 0 to 20); Internalising (membership on the scoring rule, 0 to 20).

BOUNDARY

SDQ does not diagnose a mental health condition. It is a screen and monitoring aid for clinician review.

REPORT PRINCIPLE

Show the evidence, the version, and the boundary. Leave diagnosis and formulation with the clinician.

SDQ, P4-17 parent response pattern

Synthetic responses for SDQ, P4-17 parent. The table uses this instrument's groups and range. It is not a client record and does not reproduce official item wording.

ITEM	GROUP	SYNTHETIC RESPONSE
1	Emotional problems	**Not True**
2	Conduct problems	**Somewhat True**
3	Hyperactivity	**Certainly True**
4	Emotional problems	**Not True**
5	Conduct problems	**Somewhat True**
6	Hyperactivity	**Certainly True**
7	Emotional problems	**Not True**
8	Conduct problems	**Somewhat True**
9	Hyperactivity	**Certainly True**
10	Emotional problems	**Not True**
11	Conduct problems	**Somewhat True**
12	Hyperactivity	**Certainly True**
13	Emotional problems	**Not True**
14	Conduct problems	**Somewhat True**
15	Hyperactivity	**Certainly True**
16	Emotional problems	**Not True**

Synthetic SDQ, P4-17 parent values only. Not a client record.

Source-led by design

Lirena separates published methodology, product implementation, and clinical approval. A citation does not by itself authorize administration or prove a software scoring rule.

INSTRUMENT

Robert Goodman's Strengths and Difficulties Questionnaire covers emotional problems, conduct problems, hyperactivity, peer problems, and prosocial behaviour. This entry is the P4-17 parent form only. Teacher and self-report forms are separate.

ADMINISTRATION

A parent completes all 25 items. Not True, Somewhat True and Certainly True are the only answers. This form does not include the impact supplement. Partial answers are not scored.

CLINICAL BOUNDARY

SDQ does not diagnose a mental health condition. It is a screen and monitoring aid for clinician review.

METHODOLOGY

Lirena uses this rule. Score range: Total difficulties 0-40. Emotional problems, conduct problems, hyperactivity, peer problems and prosocial 0-10. Externalising and internalising 0-20.. Parent completed four-band cut-points from the 20 June 2016 scoring notes. Total: Close to average 0-13, Slightly raised 14-16, High 17-19, Very high 20-40. Prosocial bands run in the opposite direction. Externalising and internalising have no bands. This SDQ entry is the P4-17 parent form. All 25 answers are required. The impact supplement is not included. A score is not a diagnosis. Item groups: Emotional problems (membership on the scoring rule, 0 to 10); Conduct problems (membership on the scoring rule, 0 to 10); Hyperactivity (membership on the scoring rule, 0 to 10); Peer problems (membership on the scoring rule, 0 to 10); Prosocial (membership on the scoring rule, 0 to 10); Externalising (membership on the scoring rule, 0 to 20); Internalising (membership on the scoring rule, 0 to 20).
